

Anivac Corp Attains Rights to Supply Revolutionary Disinfectant to the Animal World

Anivac Corporation is pleased to announce the availability of the Accel® product line in its offerings. Accel is a brand of registered disinfectant cleaners that contains the revolutionary Accelerated Hydrogen Peroxide® (AHP®) Technology that has been called the first new class of disinfection technology in 20 years.

The need for a safe and effective means of killing pathogens such as influenza, Parvo and MRSA has come to the forefront of the animal industry today. To combat these issues it's easy to make a disinfectant that kills pathogens but it is difficult to make a disinfectant that is safe to use.

AHP's track record is outstanding. It's currently used in:

Approximately 80% of the veterinary clinics in Canada

Approximately 80% of the hospitals in Canada

Worldwide on cruise ships

AHP is a synergistic blend of commonly used, safe (Generally Regarded as Safe (GRAS) or EPA listed inert) ingredients that when combined with low levels of hydrogen peroxide produce exceptional potency as germicide and performance as a cleaner.

Benefits over traditional disinfectants include:

In order to disinfect most traditional disinfectants require the surface to remain wet for 10 minutes, therefore requiring re-application of the product. **Accel sanitizes in just 30 seconds and disinfects in five minutes.**

Traditional disinfectants normally require a cleaning and rinsing step prior to the application of the disinfectant. Accel is considered a cleaner and disinfectant therefore it can be used as both the cleaning and disinfecting product.

AHP is an environmentally preferred product. In Canada it was the first disinfectant to receive Eco Logo Certification and in the USA it has achieved Green Seal Certification. In addition the EPA's Design for the Environment (DfE) awarded AHP with Champion Status for Safer Detergents Stewardship Initiative Award (SDSI). AHP is also rated as a Category IV product by the EPA, the safest standard.

Accel is available in Ready to Use wipes, 1L or 3.69 L Ready to Use, and Concentrate; 3.69L - 200L. For more information please go to www.marshhavenfarm.com or call Toll Free at 877-ANIVAC1 (264-8221). Dealer inquires welcomed.
